

PARTS OF THE TACK

Your **tack** (*the equipment you use for riding*) should be fitted to you and to your horse. It need not be fancy or expensive but **should be safe and well cared for**. The way you take care of your equipment, your ability to talk about it and use it properly, will show if you are a horseman or not. Tack comes in a variety of forms. Be familiar with the names and use of the kind you have.
